3/30/94

Dear Mr. Chithen -

Thank you for your good note of March 8. Regarding your query, you are right in assuming the President could not speak after his throat wound. Kellerman is wrong in his recollection of JFK speaking - no one else in the car gave such testimony - Although he was a trained SS agent, the great excitement and trauma of that day affected his recollection of events just as it did for many others -

Hope this is helpful -

Sincerely -

Gerald Posner
